TECHNICAL SKILLS

Languages : Java, Python, JavaScript, Typescript , SQL.

Technologies : Langchain, Hugging Face , AWS, RAG Pipelines , Agentic AI, Finetuning LLM, LLM Evaluation , Vector Databases, LLMOps, MLOps, Machine Learning, ReactJs, Node.js, express js, Nextjs , FastAPI , Flask , Streamlit , MongoDB, MySQL

WORK EXPERIENCE

PHATON | Backend Developer Intern

October 2025 – January 2026

- Collaborated with a cross-functional team to design, develop, and deploy scalable RESTful APIs for production
- Built and maintained backend services using Node.js, Express.js, and TypeScript, following clean architecture and best practices.
- Contributed to code reviews and version control workflows, ensuring maintainable and high-quality backend code

PROJECTS

1. NeuroMail – Gmail Assistant:

- Developed NeuroMail, an AI-driven Gmail assistant enabling users to read, draft, and send Gmail messages using natural language.
- Integrated Gmail API and Google OAuth 2.0 authentication for secure account access and email management.
- Built with LangChain agents to interpret user prompts and automate email tasks intelligently
- Designed human-in-the-loop approval for sensitive actions (e.g., sending emails), mitigating unintended automated actions.
- Set up OAuth token generation workflow, enabling secure session persistence and Gmail API access.
- Tech : Python, LangChain, Gmail API, Google OAuth 2.0 , Prompt Engineering, Streamlit

<https://github.com/Tridib2510/NeuroMail>

2. NeuroCode— Coding Assistant

- Designed and built a Agentic Coding assistant inspired by Claude Code .
- Designed a system to generate codebase-level insights (call graphs, dependencies, structure) to improve developer productivity and understanding
- Developed a cross-platform desktop GUI application using enabling intuitive interaction with the NeuroCode CLI features.
- Tech: LLMs, Prompt Engineering, Agentic AI, Generative AI ,Tkinter

<https://github.com/Tridib2510/NeuroCode>

ACHIEVEMENTS

1. **Published an independent patent in Generative AI**, demonstrating innovation in applied AI systems and large-scale language model applications.

<https://drive.google.com/file/d/1Y4m4GVFi38PID6md8rarQnTPT3eA7w0W/view>

2. **Solved 300+ LeetCode problems**

Certificates

- Machine Learning - <https://www.udemy.com/certificate/UC-a367b38d-a2b6-491f-9838-12cea59205ef>
- Generative AI - <https://www.udemy.com/certificate/UC-d92a3a1e-9eaa-4d51-9cee-8cbb6972f93f>
